

10. Has the Authority/JB Green Team cut its costs?

Yes, the JBRSWA/JB Green Team has already made several cuts to its budget. We have cut three staff positions; and absolved one management position. JBRSWA/JB Green Team removed some of the less frequented Community Drop-off locations to reduce transportation costs.

Rates and Charges were able to be reduced by putting a designation fee on the landfills. Landfills now charge \$2.00 per ton, that will come back to JBRSWA/JB Green Team to offset the rates and charges.

The **JBRSWA/JB Green Team** is proud to serve the Jefferson and Belmont Communities.

BRIEFLY ABOUT US:

The Solid Waste Authority of Jefferson &

Belmont Counties formed: In 1989, Jefferson & Belmont Counties formed the Jefferson-Belmont Regional Solid Waste Authority (JBRSWA) AKA the JB Green Team, as the state mandated county governmental agency created by House Bill 592. Our Board of Trustees is composed of 15 members representing both Counties as specified in the provisions of the Ohio Revised Code 3734-54.

Our mandate is directed by the Ohio EPA. The JBRSWA/JB Green Team is responsible for implementing a Solid Waste Plan designed to achieve the goals set by the Ohio EPA for waste reduction, recycling of Paper, Co-mingled & Glass, & reducing reliance on land filling waste generated within the two counties. To pay for these required programs House Bill 592 allows for three types of fees (disposal, generation & designation) & as a last resort assessing property.

JBRSWA/JB Green Team also provides Community Cleanups, Electronic / Tires / Household Hazardous Waste and Paint Collections, Litter Enforcement, Education & School Programs services to its residents.

COMMON QUESTIONS & ANSWERS ABOUT THE RATES AND CHARGES:

1. What is this charge?

This charge is a “municipal waste rates & charges assessment” to help fund waste management programs required by the Ohio EPA. It is levied only against lots or parcels that are improved, or in the process of being improved, with at least one permanent, portable, or temporary building. Not all property generates waste which is why this an assessment specifically on improved parcels. The recent revenue reduction from the out-of-state waste has made this again needed.

2. How much is this charge?

This is a \$9.52 per improved parcel with the Auditor's handling fee of 3%. The Authority does not receive any of the 3% handling fee.

3. Doesn't the charge have to be voted on by the residents?

No. By law (HB592) each County in Ohio must offer ways to manage solid waste through reduction, reusing & recycling programs. In order to pay for this management, Revised Code 343.08 and 343.011 allows Authorities to assess on approved parcels in order to pay for these programs.

4. Why should I have to pay when I don't feel I generate very much waste?

Many residents do an excellent job of recycling & place very little in the waste stream. This assessment pays for the recycling program as well as community clean ups & other collections we have throughout the year.

5. I own a lot of land, will this be assessed on each of my parcels?

The charge is assessed on improved parcel, one that has been improved with a house or other structure. Any vacant lots or empty parcels do not get assessed.

6. How long will this remain?

The Authority will reassess the need each year with hopes of reducing it if funding from other options increase. The Authority would lower the assessment to match only what is needed to fund our operation.

7. I recycle. Don't you receive enough money from the recycling you receive?

It is true that we generate some money from the paper and commingled recycling, but it does not cover the costs of fuel, maintenance & other costs associated with running those programs. Also, recycling is a commodity, and prices for the recycling fluctuate so the amount we receive varies.

8. How often?

This charge is applied once a year (or divided into half at twice a year). If the disposal fee revenue (as explained in #4 above) increases above the projections in the Plan Update, or other revenue sources increase the Authority will evaluate the assessment fee amount to determine if a reduction is achievable.

9. How did the amount to be charged be decided and why did it change from last year?

A specific formula was used to calculate the exact amount needed for operating costs. The budget amount needed minus the estimated amount collected from designation fees equated the rates and charges divided by the number of improved parcels in both counties. However, the new designation fees allowed the Solid Waste Authority to reduce the charges to the property owner.
